User stories

As a **Client**, I should be able to
- Register on the portal so that I can create my profile;
- Sign in on the portal so that I can use all the features available to me;
- Restore my password in case I forgot it;
- Edit my profile information so that I can keep it updated;
- View home page so that I can see what is service about and how I can use it;
- Post a job proposition so that I can show whom I'm searching for;
- View job proposition preview so that I can see how the freelancers will see my job proposition;
- Use a search so that I can find an employee that I need;
- View search results so that I can see available freelancers that match with my search criteria;
- View detailed information about the freelancer so that I can see their whole profile information;
- View freelancers portfolio so that I can see the works that freelancers already worked on;
- Hire freelancers so that I can start work with them;
- Chat with freelancers so that I can communicate with them;
- Create a brief for my project so that I can describe my needs and vision of my project;
- See the brief preview so that I can see how the freelancers will see my brief;
- View and manage the list of the projects that I created so that I can keep it updated;
- View and manage the list of my briefs so that I can keep it updated;
- Pay freelancers for the work;

As a **Freelancer**, I should be able to:
- Register on the portal so that I can create my profile;
- Sign in to the platform so that I can use all the features available to me;
- Restore my password in case I forgot it;
- Edit my profile information so that I can keep it updated;
- Edit my portfolio so that I can keep it updated;
- Withdraw money that I earn for my work;
- View home page so that I can see what is service about and how I can use it;
- Search for the projects so that I can find the work I'm interested in;
- View details about the job/project;
- View briefs in case they are added to the projects;
- Apply to job proposition/project;
- Use chat to communicate with the employee;
- View the list of the job propositions/projects that I apply for;

As an **Admin**, I should be able to:

- Sign in to the platform, so I can use all the features available to me;
- Restore password in case I forgot it;
- View the list of the users;
- Manage users (manage their accesses, delete them or block);
- View statistics information;
- Send emails to users;

User story 1

As a Client, I should be able to register on the portal using my email and password so that I can use all portal features available to me

Acceptance cases:

- After the user filled the email and password inputs we should validate the information;
- Validation for email address field, password (at least 8 characters, the combination of upper- and lower-case characters, one or more digits);
- Validation for passwords: at least 8 characters, the combination of upper- and lower-case characters, one or more digits;
- There shouldn't be a possibility to register at the platform as a Client and as a Freelancer using the same email address;
- After the registration user receives a notification as a pop-up window with the message "Thank you for signing up. You will shortly receive an email from us. Please click on the link inside to confirm your email address and start using our service.". Pop-up should have two buttons: "Close" in the top right corner and "Ok" button;
- After the registration notification is sent to the user email;
- After receiving the notification user check the email with a new income message with the text "Hello and welcome to our platform! We hope you'll enjoy using our service to find the employees you need. To confirm your registration please click the link below." and the link to confirm the email;
- After clicking via a link from the email user should be routed to the "My profile" page so that I can fill up all the information about me;
